MULTIPLE COMPANIES/AGENCIES

Held multiple roles including Team Leader/Preceptor while traveling to assist with staffing at multiple hospitals around the country. Worked mainly in Open Heart Surgery and Intensive Care.

ABOUT ME

Currently, my freelance work involves helping others with the look, feel and function of their online presence. In my free time, I coach skydivers and am pursuing wingsuit flying at a competitive level.

In the past fifteen years I have learned how to learn, the right way to teach and how to manage very complex situations. My nursing positions taught me what to value in life, and what I was missing. I honed many valuable skills in customer service and leadership. It was these difficult situations that not only built my character, but also helped me realize that I needed to be doing something that I truly loved on a daily basis. This year, I chose to attend Lambda School for their Full-Stack Web Development/Software Engineering program.
